Career Summary:

➢ I have 6 Months of experience as a Web Developer in the IT Industry.

➢ Currently I have been working with Gensol Infotech from Jun 2023.

➢ Having a good knowledge of developing Web Applications using React JS, JavaScript, REDUX, HTML, CSS.

➢ Having a good knowledge of React JS Library and its ability to create simple and scalable code for single Page Applications (SPA).

➢ having a good knowledge of Java script

➢ Good amount of work done on Reactive Forms, Template Driven Forms or Web Forms 2.0 in React JS and their Validations.

➢ Experience in making Responsive Web Pages using HTML, CSS and Bootstrap Using JavaScript.

➢ Strong exposure to design and development of physical modeling of tables involves creating detailed representation of database structure, including tables, fields, relationships, indexes, and constraints.

➢ I have hands on experience on Creating Web Pages using HTML, CSS and JavaScript.

➢ I have hands on experience on creating Single Page Application using Routing concepts.

➢ Created React JS Project from scratch with the help of NPM Commands and create-react-app

➢ Created Web pages using HTML, and CSS.

➢ Created Single Page Web Application using React JS with Routing and Next JS Routes.

➢ Added dynamic validations to the web applications using JavaScript and ES6 features.

➢ I have hands on experience on adding dynamic features using JavaScript.

Technical Skills:

➢ **Technologies**: React JS, JavaScript, REDUX, HTML, CSS, BOOTSTRAP

➢ **IDE's**: Visual Studio Code, Sublime Text.

➢ **Debugging tools**: Chrome Developer tools

➢ **Operating systems**: Windows.

➢ **Version Control:** GIT.

Educational Qualification:

Institute	Course	Year	Percentage
Krishna Chaitanya Science and Technology	BCA	2022	88%
DR BSR Jr College	MPC	2018	70%
Vikas High School	10Th	2016	7.2

RESUME

Manoj Kumar   *Mail:Manoj.kilari99@gmail.com*

Mobile: +91 9502360627

Project:1

- ➢ **Project Title**   : Health Project.
- ➢ **Technologies**   : REACT JS, JAVASCRIPT, HTML, CSS.
- ➢ **IDE**   : Visual Studio Code.
- ➢ **Role**   : UI Developer.

Description:

- ➢ Developed a responsive and user-friendly health project frontend application using HTML, CSS, and JavaScript.
- ➢ Collaborated with designers to create an intuitive user interface that allowed users to access health information and resources easily.
- ➢ Integrated APIs to fetch and display real-time data such as provider data.
- ➢ Implemented responsive design techniques to ensure the application was accessible on different devices and screen sizes.
- ➢ The application improved user engagement and facilitated better decision-making regarding their health.

Responsibilities:

- ➢ Involved in developing Responsive User Interface using React Js.
- ➢ Designed and optimized code for better Performance.
- ➢ Worked closely with team to complete all the requirements before due date.
- ➢ Helped team members to resolve any technical issue, issue identification & troubleshooting.
- ➢ Integrating API using axios and maintaining data in redux.
- ➢ Creating re-usable components using UI-component library (react-bootstrap)

Project:2

- ➢ **Project Title**   : Hospital Management System.(College)
- ➢ **Technologies**   : REACT JS, JAVASCRIPT, HTML, CSS.
- ➢ **IDE**   : Visual Studio Code.
- ➢ **Role**   : UI Developer.

Description:

- ➢ Developed the UI by using React. JS with Redux.
- ➢ Used React.js and its features such as JSX, Classes and Functional Components
- ➢ Implemented aggregated data into Components and created highly interactive and user-friendly dashboards with visual effects.
- ➢ Creating forms for CRUD operations and integrate respective API's.
- ➢ Creating responsive UI for all screen sizes using bootstrap grids.
- ➢ Used Object Oriented Programming concepts to develop UI components that could be reused across the Web Application.
- ➢ Interacted with Testing Team, Scrum Masters and Business Analysts for fixing of Issues.
- ➢ Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on everyday basis.
- ➢ Troubleshooting interface software and debugging application codes.
- ➢ Monitoring and improving Front-end performance.
- ➢ Documenting application changes and developing updates.
